OF BIOLOGY

October 3rd, 1950.

Dear Dr.Lederberg:

I acknowledge the receipt of both your letter and strain W-1177 and thank you very much for both.

I have written to Dr.Cavalli and would, unfortunately, have to bother you once more, should Dr.Cavalli not object to my getting his strain.

Meanwhile, I thank you very much for your prompt answer and for your kind intention to send me some of your reprints. I would be very grateful if you could add my name to your mailing list as well for future publications.

Many thanks also for your kind offer to call on you for any further information. For the time being, I cannot yet tell you exactly on what subject I shall work since this field is quite new for me. Since my proper field of interest lies in developmental and gene physiology I would like to work on some physiological aspect of recombinations in bacteria, but this, as you will realize, is only a very <sup>vague</sup> definition of the problem I shall work on.

Yours sincerely,

Maryueik Vogt
